

CHOEUN LYHUOY

WEB DEVELOPER

About Me

I'm a fourth-year Computer Science student with a strong passion for both front-end and back-end development. I've built two web applications using ReactJS, where I've honed my skills in responsive design, Redux, React Router, and API integration. While I haven't yet worked professionally as a front-end developer, I'm eager to bring my skills to a real-world environment. Additionally, I'm deepening my expertise in back-end development to become a versatile full-stack developer.
